Sumedh Khillare

Computer Science Engineer

 Pune

 sumedhkhillare.98@gmail.com  7066847292

 <https://linkedin.com/in/sumedhkhillare>  <https://github.com/sumedhkhillare>

Summary

Aspiring Computer Science Engineer with a strong foundation in software development, full-stack web technologies, and database management. Proficient in Java, Python, REACT, MongoDB, and MySQL. Experienced in building robust desktop applications using Java Swing, AWT, and JDBC , as well as full-stack web solutions with HTML, CSS, JavaScript, and Tailwind CSS. Gained hands-on experience integrating AI/ML frameworks and computer vision concepts into software projects.

Education

B.Tech in Computer Science Engineering	Date Range CGPA 6.80 / 10
Ajeenkya D Y Patil University	Pune
HSC (12th Grade)	Date Range Percentage 74 / 100
AEJC No.1 Tarapur	Tarapur
CBSE (10th Grade)	Date Range Percentage 77.8 / 100
AECS No.1 Tarapur	Tarapur

Projects

Airline Management System Date Range

It is a Java-based desktop application built using Java Swing, AWT, JDBC, and MySQL. It manages airline operations such as login, customer registration, flight booking, PNR-based journey search, boarding pass generation, payment, ticket cancellation, and flight information management. The system connects with a MySQL database using JDBC to store and fetch passenger, flight, reservation, login, and cancellation records.

Java, Java Swing, AWT , JDBC, My SQL, SQL, JDateChooser,DbUtils,My SQL Workbench.

Resume Builder & Analyzer Date Range

Engineered a full-stack AI resume analyzer and builder using React.js, Node.js, and MongoDB. Implemented secure user authentication, resume upload functionality, ATS score checking, and Gemini API integration for AI-based resume analysis, personalized improvement suggestions, and an integrated resume builder for creating optimized resumes.

React.js, Java Script, Tailwind.CSS , CSS , Node.js, Express.js, MongoDB, JSON, Gemini API

Tech Innovation & Problem Solving

Passionate about exploring emerging technologies, AI tools, software development, and creative problem-solving. Enjoys learning how intelligent systems and modern applications solve real-world problems.

Space Science and Aviation

Actively interested in space science and aviation; enjoys learning about spacecraft, aircraft technology, and space missions.

ML VisionAI – Multi Object Detection System Date Range

Developed an AI/ML-based object detection system using Python, OpenCV, Flask, and YOLO for detecting multiple objects in images. Integrated a Flask web interface to upload images and display detected objects with labels, bounding boxes, and confidence scores using pre-trained ML models.

Python, Flask, YOLO,OpenCV, Flask-CORS , HTML, CSS , Javascript, Machine Learning, Computer Vision,React.js

Integrated Blockchain and AI-Based Framework for Decentralized Peer-to-Peer Energy Trading Date Range

Authored and prepared a research paper for ICSICE, contributing to the model development for a decentralized platform. This platform facilitates direct renewable energy trading using blockchain, smart contracts, IoT, and AI/ML.

- Designed a decentralized platform for peer-to-peer energy trading between consumers and prosumers.
- Incorporated LSTM for energy prediction and regression models for dynamic pricing.
- Simulated secure and transparent transactions using a Hardhat-based blockchain framework.
